EDUCATION

- **ANNA University, Chennai** Chennai, Tamilnadu
B.Tech in Information Technology; CGPA: 8.4 *Sept. 2021 – June. 2025*

EXPERIENCE

- **Goeasytrip(Remote)** Singapore
Junior Software Development *Aug 2025 - Present*
 - **Full-Stack Development:** Architected and developed a full-stack travel booking platform from scratch, transforming Figma designs into a responsive front end using React and Next.js.
 - **Back-End Engineering:** Engineered a robust back end with Python Django and a RESTful API to handle data management for bookings and user accounts.
 - **API Integration:** Integrated essential third-party services, including the Amadeus SDK for flight and travel data, and a secure payment gateway for seamless transactions.
 - **Deployment and Hosting:** Deployed and maintained the application on AWS servers, ensuring high performance, scalability, and uptime.
 - **Collaboration:** Collaborated with cross-functional teams to test and deploy new features, ensuring a smooth user experience.
- **Growth Spell Software Solution (Remote)** DUBAI, UAE
Web Development Internship *April 2025 - June 2025*
 - **WordPress Development:** Contributed to code-level operations and customization of websites on the WordPress platform.
 - **Front-End Development:** Built responsive and user-friendly pages using themes, plugins, and the Elementor page builder, ensuring designs were compatible across various devices.
 - **Custom Code:** Wrote custom JavaScript and CSS to implement unique functionalities and visual enhancements beyond standard plugin capabilities.
 - **Troubleshooting:** Actively engaged in debugging and resolving website issues to ensure optimal performance and functionality.
 - **Collaboration:** Collaborated with senior developers and designers to meet project requirements and timelines.
 - **Optimization:** Gained hands-on experience in website optimization, including image compression and caching, to improve loading speed.

PROJECTS

- **AI Integrated Online Voting System (April-2025):** The AI Integrated Online Voting System is a secure digital platform that improves the election process using Artificial Intelligence, Blockchain, and web/mobile technologies. It features AI-based facial recognition for voter verification, OTP and voter ID authentication, and blockchain to ensure transparency and prevent vote tampering. With real-time monitoring and easy online access, the system prevents double voting, increases convenience, and boosts voter turnout, offering a reliable and modern solution for digital elections.

ACHIEVEMENTS AND RESPONSIBILITIES

- **Paper Publication(International Journal of Research Publication and Review) :** I have published my research paper titled “AI-Integrated Online Voting System for Secure and Private Remote Elections” in the International Journal of Research Publication and Review (IJRPR), a reputed international publication known for academic excellence and research contributions.
- **1st position:** Paper Presentation , *SIT-SCI HUM-22*(College Technical Fest) (06/2022).Paper Presentation is a competitive event where participants present their research or innovative ideas on a chosen topic within a limited time, showcasing technical knowledge, communication, and presentation skills.
- **1st position:** Badminton, (Inter College Tournament) (2022-2023). Secured First Place in the annual sports event competing against multiple colleges.

SKILLS

- **Proficient:**React, Java(Springboot)
- **Comfortable:** python (Django), MongoDB,Github
